EC 200-2-2

Circular  
No. 200-2-2

30 April 1999

EXPIRES 30 APRIL 2001

Environmental Quality

**FORMERLY UTILIZED SITES REMEDIAL ACTION PROGRAM (FUSRAP) –  
POLICY ON SITE REMEDIATION OF RADIOACTIVE AND CHEMICAL  
CONTAMINATION**

1. Purpose. This circular sets forth the U.S. Army Corps of Engineers (USACE) policy regarding the remediation of radioactive and chemical contamination at FUSRAP sites. FUSRAP sites are defined as any geographic area determined to have been used for activities in support of the Nation's early atomic energy program, or placed into FUSRAP pursuant to Congressional direction, and will be referred to as "sites" throughout this EC.

2. Applicability. This policy shall apply to all sites and vicinity properties (VPs) where USACE has lead Federal agency responsibility for cleanup of FUSRAP-related radioactive and chemical contamination under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, as amended. FUSRAP-related contamination is radioactive and chemical contamination resulting from work performed as part of the nation's early atomic energy program.

3. Distribution Statement. Approved for public release, distribution is unlimited.

4. Policy.

a. The USACE will remediate FUSRAP-related contamination at all sites and vicinity properties.

b. USACE will remediate non FUSRAP-related radioactive or chemical contamination that is mixed or commingled with FUSRAP-related contamination at all sites and vicinity properties.

c. For federally owned sites, USACE will remediate all non FUSRAP-related radioactive or chemical contamination. However, on VPs associated with federally owned sites, any proposed remediation of radioactive or chemical contamination that is not FUSRAP-related and not mixed or commingled with FUSRAP-related contamination must first be approved by HQUSACE.

d. On non federally owned sites and associated VPs, USACE will not remediate radioactive or chemical contamination that is not FUSRAP-related or is not mixed or commingled with FUSRAP-related contamination.

EC 200-2-2

**30** Apr 99

e. Any non FUSRAP-related radioactive or chemical contamination remediated in accordance with paragraphs 4.b. through 4.d. above shall be investigated to identify any potentially responsible parties (PRPs) for subsequent cost recovery of all incurred remediation costs.
